Social Media is your UI.

With the power of custodial wallets, find any information with just a tweet away. No hefty UIs or wallet extensions.

How we do it?

We use eliza os via Fleek with OpenAI plugin for achieving the same. We have made changes to the movement plugin to enable all the functionality.

Future Improvements

The sky is the limit!

- **Users will be able to create liquidity pools for their tokens.**
- **They'll be able to sell and buy different NFT's from twitter itself.**
- **Interact with all movement protocols from twitter and other social media platform**
